Product description

Flexible silicone rubber keyboard (Really Cool Series), Standard layout with low profile

The Really Cool Touch is our medical keyboard with integrated touchpad. This hygienic keyboard combines all operating and input functions with small footprint. With its flat buttons, the Really Cool Touch can be easily cleaned.

The keyboard has a touchpad and numeric block in a completely sealed, seamless housing of only 38 cm x 15 cm. The Really Cool Touch withstands easily regular cleanings with surface disinfectants, for example on the basis of alcohol. During the cleaning process, the keyboard can be locked with the so-called Tru Lock mechanism to prevent unintentional input.

You can even go a step further with our Really Cool Touch and completely submerge it for a more thorough cleaning and disinfection. The USB cable can remain connected during this time. It is resistant to falls and EN60601 certified. This keyboard keeps what it promises!

Sealed silicone design. Dust-free, contaminant-free and water-resistant

Cleans with soap and water

Tactile feedback similar to standard keyboard

Integrated touchpad

USB Plug and Play (PS/2 on demand)

Optional available with

integrated solinoids for easy fixing

modified cable length
