

KWG-19 Keyboard Drawer 2HE with different Angles of Inclination

19-Inch Drawer with or without integrated Keyboard.

Description

New Drawer Technic

The flat, retractable keyboard drawer KWG-19 offers high input reliability for areas that require maximum volumetric efficiency. The 2HE drawer is designed for 19" 2U rack mount systems and for control consoles with an installation depth of at least 150 mm.

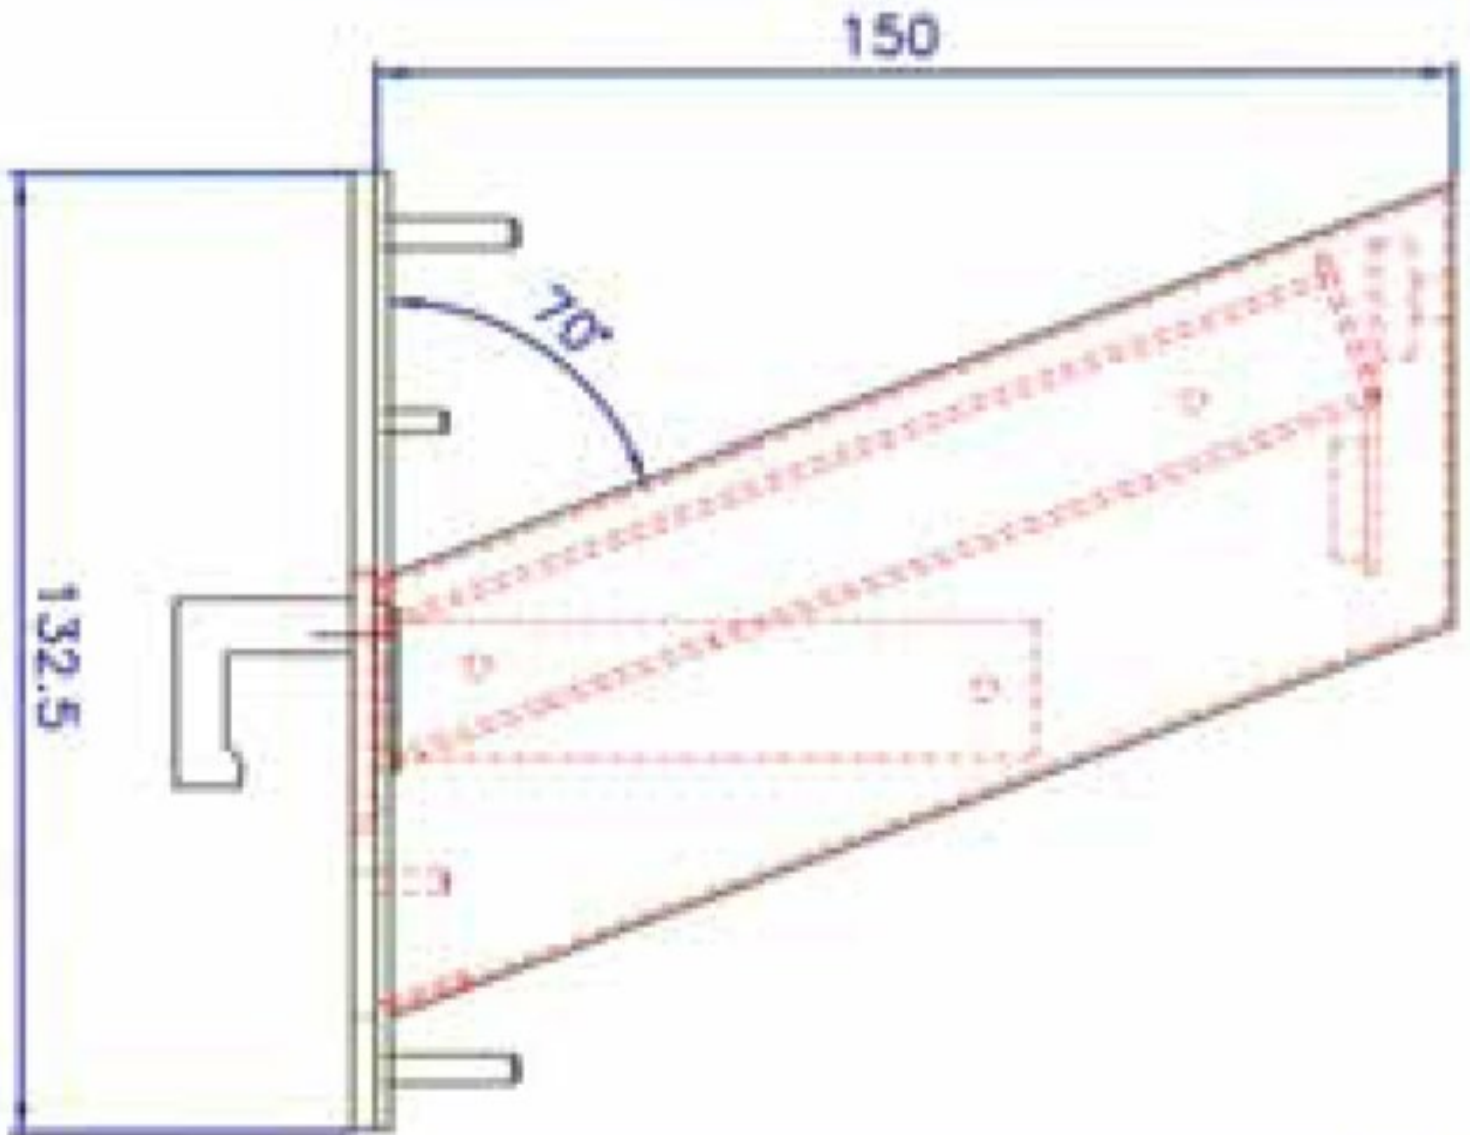

Three different angles of inclination

There are three angles of inclinations available, 70°, 78° or 90°. The user can decide which angle most fits for his personal convenient data input. The patented locking system in conjunction with the telescopic tracks with the smooth ball-bearing system provides the user with a high-quality drawer with a long operating life. When the KWG-19 is locked, it is dust and water resistant in accordance with IP65.

Available with integrated Keyboard

Ideal for the standard 19" industrial keyboard KWD-85 by GeBE. This long-travel keyboard comes with IP65 and an integrated [Trackball](#). Both can be delivered separately.
