Keyboards

with Touchpad

Product description

This keyboard is constructed of a stainless steel frontplate with an integrated Touchpad for frontpanel mounting, which is facilitated by the studs on the backside of the keyboard.

Due to its ruggedness and its IP65 / NEMA 4 rating of resistance against liquids and dust this keyboard can even be used for outdoor purposes.

This keyboard has an integrated touchpad with 2 keys instead of the NUM-block. This saves alot of space and the touchpad is close to the rest of the keyboard. There are no mouse keys located on the keyboard. The clicking is done by simply tipping on the surface of the Trackpad.

Like the other keyboards of the fullsize-range this keyboard is water- and dust proof to IP65.

As backpanel mounted version this keyboard can be easily integrated into an existing housing.

Technical data

Mechanical data

Housing	High-Grade Steel
Degree of Protection	IP65
Dimensions	145,4 x 449 x 29 mm
Cable Length	180 cm

Technical data

Keys

Key Technology	membrane
Number of Keys	105
Operational Life	10 mio. keystrokes min.
Stroke Force	0,9 ± 0,1 N
Stroke Travel	1,6 ± 0,1 mm
Key Legend	Laser

Electric Data

Interface	PS/2
Additional Interface	PS/2

Environment

Operating Temperature	from 0 °C to +60 °C
Storage Temperature	from -20 °C to +70 °C
