Keyboards

Features

- The drawer can be easily retracted and extended using ball-bearing telescopic rails.
- The extension is inclined by 12 °. The front panel is made of aluminum, natural anodized and has a bevel of 45 °.
- The wide pull-out handle is in alignment with the keyboard and serves as a practical, and above all ergonomic, support for the ball of the hand.
- Suitable for applications with an installation depth of up to 150 mm.
- The housing is made of galvanized sheet steel and the front is made of powder-coated aluminum (standard according to RAL 7035).
- The integrated magnet reliably holds the drawer shut when it is closed.
- Water and dust resistant according to IP65 on the front.
- The KWG-19 is very well suited for long-term, rough use in mechanical and plant engineering or in assembly and manufacturing technology.

Technical data

Keyboard drawer 19", 2HE, without keyboard
