Touchpads

Features

- The GFT-2T touchpad developed out of the modular design of the GFT series, is especially suitable for extremely confined working environments.
- The space saving module is 10 to 10 centimeter in size and ideal for use in cramped areas. The touchpad is a plug-and-play device with USB interface.
- Once parked, it requires no additional space for moving the mouse.
- Particularly suitable for mouse input in industry, medicine, laboratory and measuring technology and engineering.
- Completely closed surface, dust and splash-proof according to DIN IP65.
- Good tactile feedback from metal domes.
