Product description

The matrix block belongs to one of the smaller keyboards of the KVG series. It has 12 round keys, which were built-in as a metal dome in the matrix. You can feel any keystroke. The membrane promises a high-quality stainless steel look.

The matrix is provided with an adhesive film and is easy to install. We have the appropriate controller GCK-978 on stock.

They are ideally used in situations where priorities are the IP seal level and ease of cleaning (foodstuff, chemical industries, etc)

Features

- Dust and splash proof according to DIN IP 65
- The keys are built-in as a metal dome
- Easy to install due to the adhesive film on the back side of the matrix
- High-quality optics with 12 round keys with a diameter of 17 millimetres

Technical data

Mechanical data

Degree of Protection	IP65
Dimensions	80 x 105 mm
Cable Length	15 cm

Keys

Number of Keys	12
----------------	----

Electric Data

Interface	Matrix
-----------	--------

Environment

Operating Temperature	from -10 °C to +70 °C
Storage Temperature	from -25 °C to +85 °C
