

Industry · Stainless Steel Keyboards · Mouse Replacement

TVG-38 Industry Laser Trackball with scroll wheel, Made in Germany,

Ergonomic optical Trackball, two Mouse keys, for Terminals and POS.

Artikel-Nr.	TV1057
Bezeichnung	TVG-38-2-Scroll-Optisch-USB
Ausführung	USB interface

Product description

The TVG-Series consists of different mouse modules, easy to integrate in the vandalproof stainless steel frontplate.

The frontplates including an additional scroll wheel are brand new. Next to the 38 mm optical Trackball the user can ease the data input by using the new scroll wheel right left to the ball, fixed inbetween the two mouse keys. This promises a faster data input.

In combination with the vandal resistant high-grade steel front panel, it can be used in extremely rugged applications. The trackball has a diameter of 50.10 mm and glides on extremely robust and durable steel rolls. With this quality, these modules are suitable for applications in the industrial manufacturing, medical technology, and food processing industries.

The trackballs are available in either 38 mm or 50 mm diameter. The switches are flush with the frontplate and cannot be pryed out.

The rear-mounted studs allow simple integration into other panels and housings. The interface is available in all standard interfaces.

Technical data

Mechanical data

Dimensions	113 x 99 x 30 mm
Housing	Metal
Degree of Protection	IP68
Cable Length	180 cm

Keys

Key Technology	short travel key
Number of Keys	2

Technical data

Operational Life	1 mio. keystrokes min.
------------------	------------------------

Electric Data

Additional Interface	for trackball USB
----------------------	-------------------

Environment

Operating Temperature	from 0 °C to +55 °C
-----------------------	---------------------

Storage Temperature	from -25 °C to +85 °C
---------------------	-----------------------

Additional Information

Ball Diameter	38mm
