Product description

The silicone keyboard is equipped with a sealed touchpad. The tight installation in the front panel avoids loopholes and thus protects the entire keyboard mechanics in the long term.

Features

- Ball-bearing telescopic rails make it easier to move in and out.
- The front panel and pull-out handle are made of painted sheet steel RAL 7035 or RAL 9006 fine structure / graphite (other colors on request).
- Particularly suitable for applications with a small installation depth.
- To match the drawer, tastaturen.com offers the KWD-85, a silicone keyboard in a sturdy front panel.
- Both the keyboard and the drawer (closed) are protected against dust and splash water in accordance with DIN IP 65 on the front.
- The keyboard is very easy to install using 19 " mounting holes on the side or stud bolts integrated on the back of the front panel.
