Product description

Elevate your editing experience with the XBE-12 Jog Shuttle, a versatile and programmable keypad designed for seamless control that features a Jog & Shuttle control embedded within. Take command of your workflow with customizable keys that are easily programmable.

Choose from a full spectrum of colors with the RGB backlighting to personalize your setup and create an environment that enhances creativity. Not only does it add a touch of style, but it also serves as activation lights for quick visual cues.

Tailor your keypad to your exact needs with 12 fully programmable keys. Download our free MacroWorks 3.1 software to easily assign macros, shortcuts, and complex commands to the programmable keys on the XBE-12 Jog & Shuttle without requiring advanced technical skills.

Program commands in up to fifteen zones on the shuttle ring - seven clockwise, seven counter-clockwise, and one at zero. Program separate commands for clockwise and counterclockwise rotation of the jog wheel. Alternatively, raw positioning data may be read from the device as described in our free SDK.

Immerse yourself in a vibrant gaming or work environment with customizable RGB backlighting. Choose from a spectrum of colors and lighting effects. Programmable backlighting also serves as intuitive indicator lights, providing visual cues for various functions and commands.

The XBE-12 Jog & Shuttle boasts a sleek, low-profile aluminum case that not only enhances durability but also provides a slight angle for ergonomic comfort during extended use.

Take personalization to the next level by easily switching out keys and rearranging the layout to suit your preferences. Add key blockers to organize groupings of keys and serve as tactile guides, allowing your fingers to effortlessly navigate the keyboard.

Technical data

Mechanical data

Housing	Aluminium
Degree of Protection	IP40
Dimensions	95 x 178 x 50 mm
Cable Length	300 cm

Keys

Number of Keys	12
----------------	----

Electric Data

Interface	USB
-----------	-----

Environment

Operating Temperature	from -20 °C to +60 °C
Humidity	80% RH non-condensing

delivery form

Weight	0,54 kp
