Product description

The compact keyboard is washable as the electronics are sealed inside for protection. The sterilizable protective cover keeps germs away. Discover all the features that make this keyboard perfect for use in medical and other hygiene-sensitive environments.

The keyboard is resistant to most common surface disinfectants and allows you not only to clean but also to disinfect. To comply with your cleaning protocol, both the keyboard and the cover can be immersed, rinsed, sprayed, wiped with soap and water and also cleaned with approved cleaning agents.

The Very Cool Flat has very good tactile feedback. The cover has a slight relief for easy and blind typing. You do not need to disconnect it during cleaning. Press and hold the F11 button for 3 seconds to lock or unlock and save your data during the cleaning process.

The matching protective cover prevents bacteria from penetrating between the buttons. It can be sterilized in an autoclave or thermal disinfectant for maximum hygiene.

The Very Cool Flat comes with a 45 cm cable that can be run in 4 directions, plus a 150 cm extension cable that can be run on a trolley, desk or into a wall. The cable has double cable strain relief for maximum sustainability.

Technical data

Mechanical data

Housing	Plastic
