 KWD-104 Tisch Tastatur für 19-Zoll-Schubladen für's Büro und Homeoffice

 KWD-104 Tisch Tastatur für 19-Zoll-Schubladen für's Büro und Homeoffice

Product description

Due to the complete protection of the electronic components, all contacts and mechanic guide elements the long-travel keyboard is ideal for applications in rough environments.

Further specials are on the one hand the integrated fingermouse function. Therefore, neither an external mouse nor an external trackball is needed. On the other hand different country versions are available e.g. cyrillic, czech, norwegian, etc. The compact shape in 19-inch format saves valuable desk or workshop space. Comes with USB interface.

Electromagnetic compatibility (EMV), static screen: Post Vfg. 1046/1984/VDE 0871, class B., FCC part 15, subpart B, class B.

Features

- Complete protection of the electronic components, all contacts and mechanic guide elements against dust and water splashes.
- A finger mouse can be integrated into the cursor-up key, which makes an additional mouse unnecessary (see closeup).
- Designed for industrial use even under some of the most hostile environments.
- Double-shot moulded key tops, anti-glare and wear-resistant.
- Great tactile feedback and 3.25mm of travel make this keyboard just as comfortable and ergonomic to us as a standard office keyboard.
- Optionally with background lighting (LEDs)
- In order to avoid soiling of the key gaps we recommend the protective plastic film.
- The keyboard can be customer-specifically adapted and is available in different country version layouts.
- These keyboards are available on request at the same price with XT interface.
- Comes with USB or PS/2 interface.
- According to RoHs

Technical data

long travel keyboard optionally with background lighting (LEDs)

Mechanical data

Dimensions	405 x 185 x 44 mm
Weight	1,4 kg
Housing	Plastic
