Product description

To a certain extent freshly printed - or better BOLD LASERT we Designed a keyboard for visually impaired people with the aim to make operating the keyboard more easily and also to preserve the eyes.

The letters have a height of approx. 9 mm instead of the otherwise usual 4-5 mm. By their fat writing and the selection of a suitable Zeichensatzes the individual fields additionally substantially clearer than with appear a standard keyboard.

Also the arrows for Cursor-Functions, Shift-layer etc. are larger and printed in bold letters.

Surely one could imagine still larger keys, this however would require another keyboard mechanics. Thus we did limited us to present a modified standard keyboard, in order to keep the initial costs small.

Special characters on the Shift-layer are held consciously small. Here a compromise between appearance, clarity and functionality was selected.

The inscRiPtion is lasered in order to have permanent legends and also to have a supperb resistance to abbreSSION. The contrast of the dark-gray inscription to the beige background is relaxing for the eyes.

On the part of functionality there is no difference to a standard keyboard. All characters of a standard keyboard (German layout, others on request) are transmitted to the PC, even if the @ - Symbol or the Euro is not visible.

Note: The keys do NOT have a relief as with a Braille.

Primarily this keyboard is meant for sehbehinderte humans, who are often already impossible the operation of a standard keyboard. Older humans and infants profit however likewise from the special organization of this new keyboard.

Sometimes also unfavorable lighting conditions cannot be gone around. In such cases this keyboard is ideally applicable here.

You would like a similar keyboard, however with a modified layout (e.g. French). Please fell free to contact us!

Technical data

Mechanical data

Dimensions **474 or 474 x 174 or x 174 x 33 or x 33 mm**

Weight **0,750 kg**

Housing **Plastic**

Cable Length **150 cm**

Keys

Key Technology **conductiv rubber**

Number of Keys **105 or 105**
